

The FlyAway Retractable Screen is an effective shade cloth, cutting down sun light by 50%, 75% or 90%.

FlyAway Retractable Screens provide the best of both worlds. When in use, they provided a durable, efficient barrier against pests, rain and wind while providing even air flow. When the weather and season permit the retractable screen disappears into its housing with the push of a button.

DURABLE AND FUNCTIONAL

Our retractable screens are in use at commercial sites, farms and ranches throughout America and Canada. They provide the

ideal solution for air flow in barns, pole buildings, processing plants and stalls while keeping animals, insects and debris out.

Don't settle for anything less than the FlyAway Retractable Screen System — the only commercially made operating screen system and international award winner.

RETRACTABLE SCREEN SYSTEM

TURN ANY OUTDOOR AREA
INTO A PEST-FREE OASIS.

Our retractable screens were originally designed for the commercial and agricultural industries to provide a tough, durable screen that would keep pests out, while allowing fresh air to flow through buildings. We accomplished that and more. In the process we became an international award winner. Soon our screens were popping up in barns and commercial buildings throughout America and Canada.

It didn't take long until some car nut got wind of this and asked if we could make a

screen for his two-car garage so he could work on his old Chevy in bug-free comfort. Pretty soon we were getting calls to provide screens for a Lanai in Hawaii or a porch enclosure in Florida, or a gazebo in Northern Minnesota.

Today our Motorized Retractable Screens are being used wherever people want to enjoy the outdoors and fresh air while keeping bugs and pests out. Which, is just about everywhere. In fact, our screens are being specified into more and more new homes and additions every year.

Multiple screens can be operated as one or individually!

THE PERFECT FIT IN EVERY APPLICATION

Every FlyAway Motorized Retractable Screen is custom made to your exact opening using heavy weight, coated screen, which retracts onto a heavy duty 3" roller mounted at the top. The roller is powered by an ultra quiet, super reliable, electric motor, hidden within the roller itself — protecting it from dust and potential damage — and operated by remote control.

The perfect fit and finish of the completed screen make it hard to tell it's even there. The side rails are extremely low profile and virtually disappears in the final installation.

FlyAway Retractable Screens can be ordered different degrees of shade, including 72%, 92% or solid vinyl and solid vinyl with clear vinyl windows.

The FlyAway Retractable Screen System is the affordable way to turn virtually any outdoor area into a cool, comfortable and pest free sanctuary.

- Custom built to any opening
- Concealed design
- Roller & motors are hidden from view
- Professionally installed or Do-It-Yourself
- Whisper quiet operation
- Secure, taught fit
- Precision fitting keeps bugs and pests out
- Prohibits wind and rain while allowing air exchange

CUSTOMIZABLE FOR ANY APPLICATION

- Patios • Porches • Under Decks
- Garages • Pole Sheds • Barns
- Manufacturing
- Food Processing Plants

In many installations the headers and tracks are completely hidden & protected.

The FlyAway Motorized Retractable Screen is the only screen system that is completely self-sealing. Our patented side rail design locks out pests and provides a taught, rugged screen panel.

FlyAway's unique track design is what makes the retractable screen system possible. Heavy duty extruded anodized aluminum tracks are mounted to the side jambs of the opening. The screen rides

within these tracks preventing gaps and keeping the screen taught throughout its operation. Along the bottom rail sits a rugged vinyl gasket that allows the bottom rail to mold itself to the contour of the ground.

It's perfect for porches, patios, under decks, garages, barns, warehouses, manufacturing plants, or any opening where you want to maintain air flow while keeping bugs, birds and pests out as well as wind and rain.

A whisper quiet motor operates the screen at impressive speeds and is easily controlled by a handy remote control, just like any common garage door opener, only quieter and with equal or greater speed.

Call today and order your FlyAway Retractable Screen, custom made to fit your specific opening. With our 100% satisfaction guarantee, you have nothing to lose and a dry, pest-free, ventilated work space to gain.
